## **\$20 donation to enroll child into Ten Marks**

This past school year 5<sup>th</sup> grade used the online Ten Marks Math Program and found the program to be a valuable resource to help our students master the common core math standards. Ten Marks Math is designed for the common core standards. It covers all learning objectives for each grade level. The content is rigorous, but engages the students by **bringing math to life**. The program does not replace the teacher, we will still deliver the lessons, but Ten Marks Math is an added resource to enrich or remediate the lesson by using visually stimulating graphics which are engaging and rigorous. Each student follows along at their own pace, and it is never apparent who finishes first or last. Ten Marks Math helps the students to learn that they need to read each problem carefully, follow a multiple step process, and analyze what the question is asking. Our grade level is hoping to add the Ten Marks Math Program as an additional resource for our students to use for the 2017-2018 school year. To enroll a student in the program, the cost per student is \$20.00. Each teacher in our grade level is requesting a \$20.00 donation from each student, so they can be enrolled in the Ten Marks Math Program.
